Hand disinfectants with skincare properties

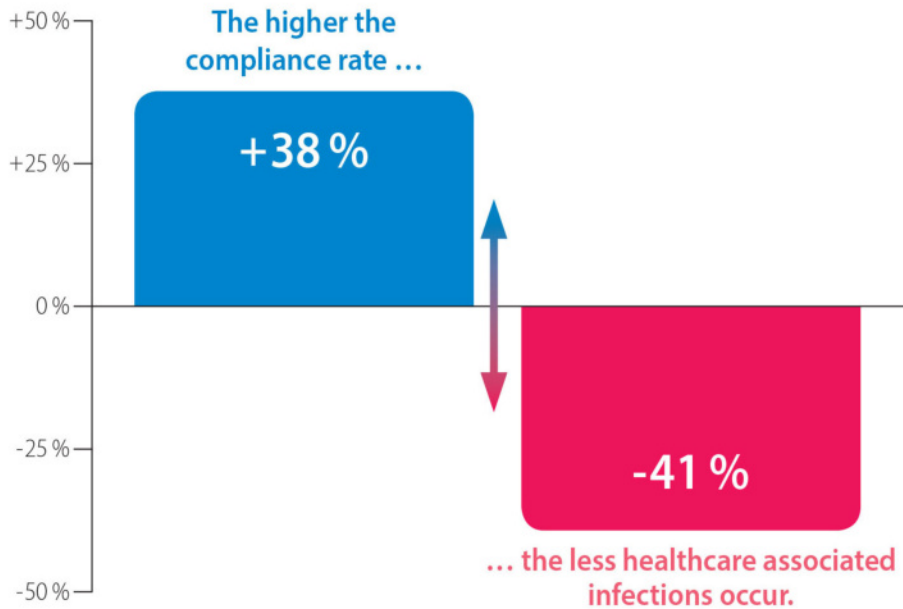

Protects your hands against harmful pathogens
and prevents cracked skin

we protect lives
worldwide

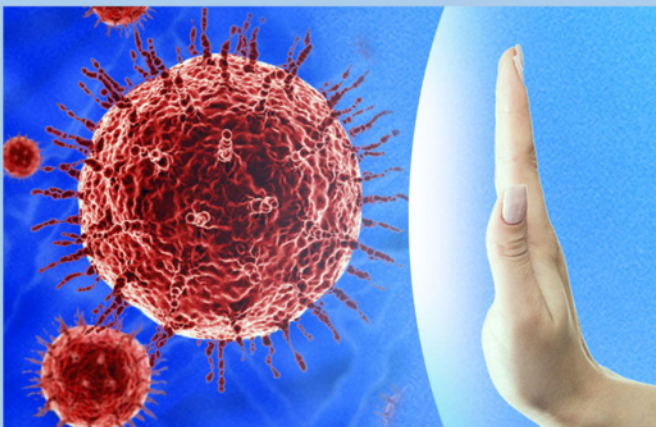

Better compliance reduces the risk of infections.

The risk of transmitting healthcare associated infections can be reduced significantly by disinfecting hands regularly and thoroughly.

D.Pittet et al, Effectiveness of a hospital-wide programme to improve compliance with hand hygiene, The Lancet Vol 356 (2000): 1307-1312

A successful disinfection requires disinfectants that are both:

- SKIN PROTECTIVE
- HIGHLY EFFECTIVE

Our handrubs offer effective protection against harmful pathogens. It is not surprising since schülke has more than 130 years of experience in the hygiene business, producing quality disinfectants to protect the lives worldwide.

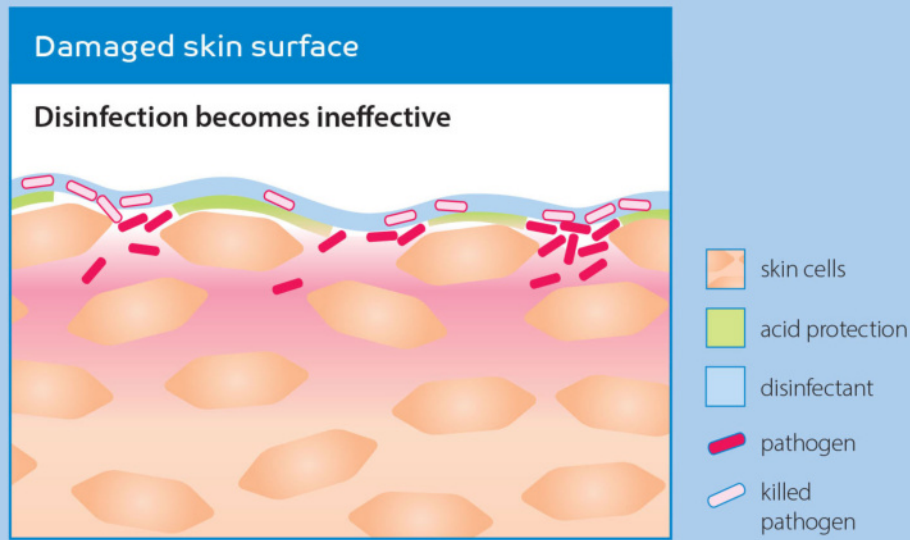

A good hand disinfectant will not be complete without having the ability to protect the skin.

This dual capabilities to effectively eliminate pathogens and to provide skin protection, are the values our hand disinfectant range brings to the user.

Healthy skin is the first barrier against pathogens!

Efficacy can be compromised with unhealthy skin (e.g. cracked skin)

The pathogens on damaged skin cannot be effectively removed by disinfectants.

Good hand hygiene compliance requires healthy skin

Hand hygiene e.g. disinfecting the hands with handrub can be painful when skin is injured or damaged (cracked skin). As a result, hands are disinfected less often putting the patients at risk.

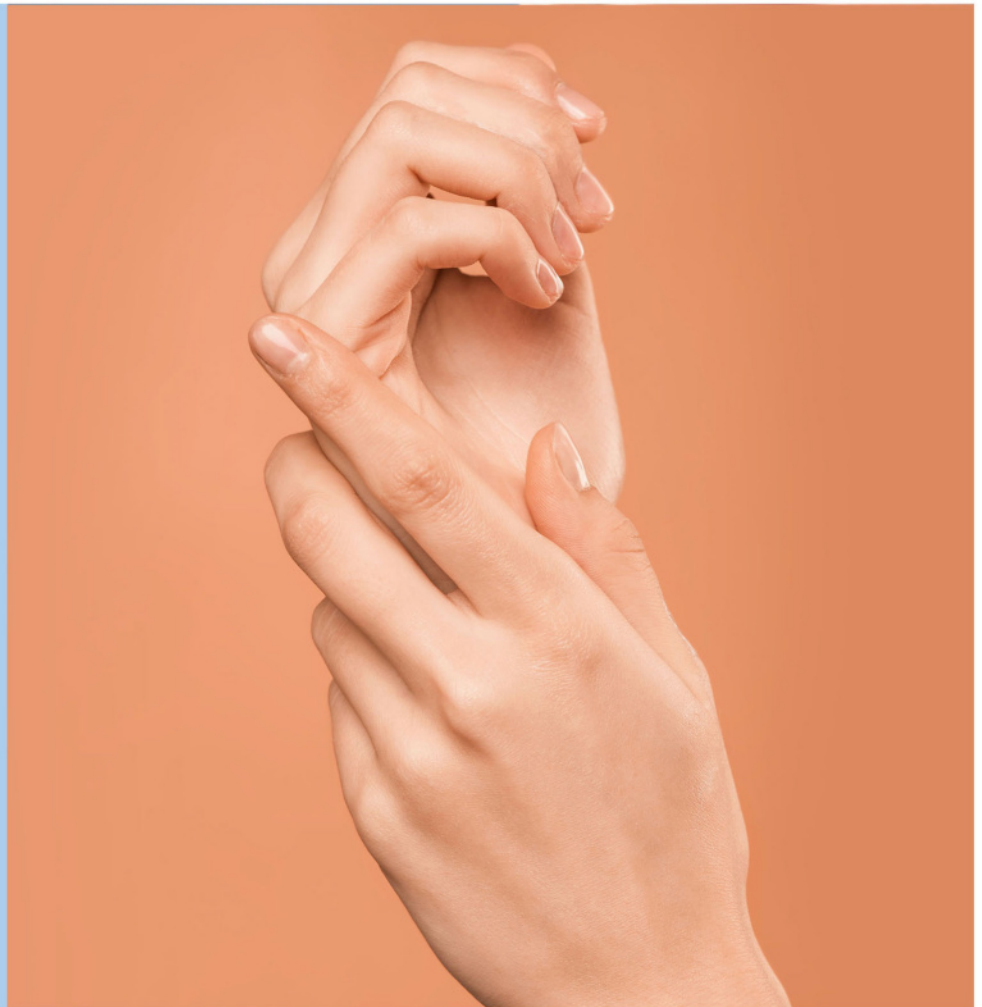

Skin comfort makes the difference

Alcohol - the ideal antiseptic for hand hygiene

Unlike soap and water, the skin's innate pH is not clinically altered by alcohol. Because of this, the skin-protective properties of the natural acid mantle of the skin are preserved.

The alcohol component evaporates very rapidly during the use of alcohol rubs. In the process, the important skin lipids are dissolved but not removed. Instead, they are redistributed – the skin's fatty film remains intact.

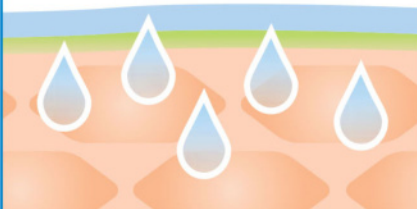

schülke hand disinfectants are effective and protect the skin

All schülke disinfectants contain ingredients that make the products extremely skin-friendly. Depending on the product, schülke hand disinfectants contain:

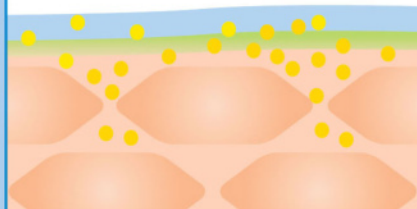

Moisturising ingredients

Provide the skin with moisture

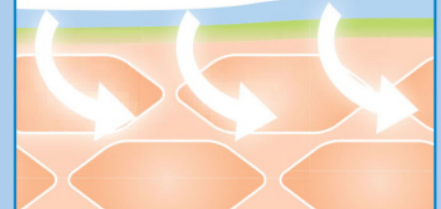

Re-fatting agents

Support the skin protection barrier

ProPanthenol-complex

Helps the skin to regenerate

desderman® care

Broad spectrum antimicrobial efficacy including viruses

Active ingredients

100 g solution contains:
89.1 g Ethanol

Areas of application

- Hygienic hand disinfection:
EN 13727, EN 1500 (30 sec.)
- Surgical hand disinfection:
EN 13727, EN 12791 (90 sec.)

desderman® care

- Product for all year use
- Virucidal according to EN 14476

Features

- Broad spectrum of efficacy (incl. viruses according to EN 14476)
- Outstanding skin feeling through an innovative skin care formula (ProPanthenol-complex and vitamin E)
- Clinically confirmed with skin care effects

- Skin caring ingredients: Dexpanthenol + Vitamin E

Outstanding skin protection and care through an innovative formulation.

- Colour and fragrance-free

Use disinfectants safely. Always read the label and product information before use.

desmanol® pure

Our latest innovation - with the benefit of skin care formula (ProPanthenol-complex)

Active ingredients

100 g solution contains:
75 g propan-2-ol

Areas of application

- Hygienic hand disinfection:
EN 13727, EN 1500 (30 sec.)
- Surgical hand disinfection:
EN 13727, EN 12791 (90 sec.)

desmanol® pure

- Gentle to skin due to innovative formulation
- Broad spectrum of efficacy

Features

- Ready-to-use alcoholic rub
- All-season product: protects safely against infections all year round
- Virucidal according to EN 14476
- Outstanding skin feeling through an innovative skin care formula (ProPanthenol-complex)

➤ With extra care because of ProPanthenol-complex

ProPanthenol-complex is a skin protectant with anti-inflammatory properties. It can help improve skin's hydration, elasticity, and smooth appearance.

➤ Colour and fragrance-free

Use disinfectants safely. Always read the label and product information before use.

MICROSHIELD® Handrub

Reliable disinfectant with alcohol + CHG for everyday use

Active ingredients

70% v/v Ethanol and 0.5% w/v Chlorhexidine Gluconate

Areas of application

- Hygienic hand disinfection: EN 1500 (30 sec.)
- Surgical hand disinfection: EN 12791 (90 sec.)

MICROSHIELD® Handrub

- Broad spectrum of efficacy
- Enriched with emollient and moisturizer

Features

- Ethanol-based with CHG in liquid format
- Broad spectrum, fast-acting

➤ With added skin-protection:

With extra care because of emollient and moisturizer. These skin care properties help to maintain the acid-mantle of the skin and keep skin hydrated.

➤ Comes with a pleasant fragrance

➤ Enhanced safety feature:

New lock pump to increase patient safety from unintentional access.

Use disinfectants safely. Always read the label and product information before use.

MICROSHIELD® Angel Blue

Ethanol gel-based alcohol handrub with excellent skincare properties

➤ With added skin-protection:

With extra care because of emollient and moisturizer. These skin care properties help to maintain the acid-mantle of the skin and keep skin hydrated.

➤ Comes with a pleasant fragrance and colour

Active ingredients

70% v/v absolute ethanol and tartrazine.
Preservative: Phenoxyethanol

Areas of application

- Hygienic hand disinfection: EN 1500 (30 sec.)

MICROSHIELD® Angel Blue

- Broad spectrum of efficacy
- Enriched with emollient and moisturizer

Features

- Gel format
- Broad spectrum, fast-acting
- Dermatologically tested
- Enriched with emollient and moisturizer
- pH-balanced

Use disinfectants safely. Always read the label and product information before use.

MICROSHIELD® Angel Clear

Ethanol gel-based alcohol handrub with excellent skincare properties

Active ingredients

70% v/v absolute ethanol and tartrazine
Preservative: Phenoxyethanol

Areas of application

- Hygienic hand disinfection:
EN 1500 (30 sec.)

MICROSHIELD® Angel Clear

- Colour and fragrance-free
- Broad spectrum of efficacy
- Enriched with emollient and moisturizer

Features

- Gel format
- Broad spectrum, fast-acting
- Colour and fragrance-free
- Dermatologically tested
- Enriched with emollient and moisturizer
- pH-balanced

➤ With added skin-protection:

With extra care because of emollient and moisturizer. These skin care properties help to maintain the acid-mantle of the skin and keep skin hydrated.

➤ Colour and perfume-free

Use disinfectants safely. Always read the label and product information before use.

MICROSHIELD® Antiseptic Handrub

The newest member of the MICROSHIELD® family.

It's strong on effectiveness and big on skin care making it the ideal addition to any setting where surgical hand preparation is a requirement.

Active ingredients

Contains: 75% v/v isopropanol
and 10% v/v ethanol

Areas of application

- Hygienic hand disinfection:
EN 1500 (30 sec.)
- Surgical hand disinfection:
EN 12791 (90 sec.)

MICROSHIELD® Antiseptic Handrub

- Broad spectrum of efficacy
- Enriched with emollient and moisturizer

Features

- Ready-to-use antiseptic handrub
- Suitable for surgical hand antiseptics
- With dexpanthenol for added skin care and protection
- Dermatologically tested

Use disinfectants safely. Always read the label and product information before use.

➤ With added skin-protection:

With extra care because of dexpanthenol. Dexpanthenol is converted into pantothenic acid in skin cells. Pantothenic acid belongs to the group of B vitamins and is essential for skin formation and regeneration.

➤ Colour and perfume-free
